$K = n \cdot r / (1 - (1 + r)^{-n})$, где r = годовая ставка / 12, n — срок в месяцах. Общая сумма выплат = S × K; переплата = S × (K − 1); ежемесячный платёж = S × K / n. Пример: 4 600 000 ₽ под 6,0 % на 20 лет → K = 1,719, выплаты ≈ 7 909 399 ₽, переплата ≈ 3 309 399 ₽.
